# capacity, dimensions & benefits

**Southern Cross Pottery** water purifiers remove virtually all impurities, keeps the water cool naturally, makes the water taste better all without the need for plumbing or electricity. Using a carbon and ceramic gravity filter our system does not remove healthful minerals, such as calcium and magnesium, and does not leave the water tasting flat. Our purifiers are not only an attractive addition to your home or office but also acts as a water storage container and the entire unit is stoneware including the filter container.
