Connecting With the System

For a little information about the login, as far as I have done is checked my area and in California the two biggest closest cities to where I live is San Francisco & Los Angeles. Which is the ending SF & LA. Listed below are a FEW of the other abbreviations for the other states.

Connection Established

After you have connected with the system you will get the following prompts:

HOST CONNECTED:

ID#:

The Identification number is a ")" followed by the last nine digits of someones versatel card. The first two digits in a zone are ALWAYS the same. These first two digits are like the area codes for a Versatel Card. The easiest way to find out what the two numbers for your area are is look at your parents or your card. After you have gotten the first two digits least that lower the nine digit code down to seven. The ID# is what I have found the hardest to get a hold of. So once you have that all your troubles are over!

PASSCODE:

This is alot easier to get than the ID# like on most systems that have users that are not aware of the dangers of having a code that is obvious, this system also has unskilled people using it. The passwords are VERY easy to guess. The only thing that makes it a little harder for hacking is they do not echo the characre is one quick way around that, HALF DUPLEX.

Here are two ID#'s and Passcodes that I have hacked, please use them sparingly and dont do any major damage.

ID#	:	PASSCODE
)694532344:		VERTELL
)692313425:		MAXCREDIT

Benifits of B of A Over TRW

HOME BANK.TXT

On this system not only can you credit their credit information after you have it and card an Item you can scramble their funds around and they will NEVER know what hit them. The best thing to do is wait for three days after you have carded the item, then call the system and pay the item off and then transfer their funds from their checking to their Credit Card and vice versa and then go into the savings and throw that money were ever. It works great because after they get everything straight again they will notice some money gone, blame it on the bank and never think of out side "help".

Main Menu Commands

Here is what you can expect to find once you login to the system:

COMMAND LIST

- 1-MAIN MENU
- 2-PAY BILLS
- 3-TRANSFER FUNDS
- 4-BALANCE INQUIRY
- 5-REVIEW OR CANCEL
- 6-ELECTRONIC STATEMENT
- 7-ELECTRONIC MAIL
- 8-LOG OFF

The Following commands can be entered at any "?" prompt and do the following:

- ?-COMMAND LIST
- Q-RETURN TO THE MAIN MENU
- B-BEGIN FUNCTION AGAIN
- P-NEXT PAGE
