PLANT POISONS ARE VERY EASY TO  
ADMINISTER AND ARE HARD TO TRACE. A  
FEW LEAVES IN THE SALAD AREN'T NOTICE  
AND THE VICTIM DIES WITHOUT KNOWING  
WHY.

RHUBARB, FOR ONE, IS A DEADLY  
POISON. THE STALKS ARE FINE BUT IF  
YOU EAT OF THE LEAF, YOU'LL DIE.  
COOKED, THE LEAVES TAKE AN HOUR OR SO  
BUT IN A SALAD THEY KILL ALMOST  
IMMEDIATELY.

THE RHUBARB BOUGHT IN STORES HAS  
ALL THE LEAVES TAKEN OFF SO YOU WILL  
HAVE TO GET THE LEAVES FROM A FARM OR  
GROW YOUR OWN.

YOU DON'T HAVE TO BE STINGY WITH  
RHUBARB AND MOST OTHER PLANT POISONS  
LIKE FIGURING GRAINS AND GRAMS. JUST  
CHOP UP SOME LEAVES AND PUT THEM IN  
THE SALAD OR STEW OR AMONG THE LETTUC  
ON HAMBURGERS AND YOU WILL HIT THE  
JACKPOT.

CASTOR BEANS ARE A GOOD POISON A  
THEY ARE ALMOST TASTELESS WHEN GROUND  
AND ONLY THREE OR FOUR ARE ENOUGH TO  
KILL. THEY'RE EASY TO GET, ESPECIALL  
IN SOUTHERN CALIFORNIA WHERE THEY GRO  
WILD. THEY CANN BE PUT INTO ALMOST  
ANY FOOD.

OLEANDERS ARE COMMON FLOWERS BUT

MISM11.TXT

ARE ABOUT AS POISONOUS AS ANY PLANT.  
THE HEART IS AFFECTED VERY QUICKLY AND  
SEVERLY. BOTH THE LEAVES AND BRANCHES  
ARE LETHAL.

A COUPLE ON POSETTIA LEAVES WILL  
KILL JUST ABOUT ANYBODY. BETTER USE  
THREE.

YEW IS A CONIFER, OR CONE BEARING  
EVERGREEN TREE OR SHRUB. ANY NURSERY  
MAN CAN TAKE YOU OUT IN BACK AND  
IDENTIFY IT FOR YOU. BUT HE WILL GET  
PRETTY SURLY IF YOU START STRIPPING  
OFF BRANCHES SO YOU SHOULD BUY A SMALL  
TREE, IF YOU DON'T KNOW WHERE A BIG  
ONE IS GROWING.

IT'S THE FOLIAGE THAT KILLS SO  
FORGET THE BERRIES. IT IS SO  
POISONOUS AND SO QUICK THAT AT ONE  
TIME THE SECRET SERVICE CONSIDERED FO  
SUICIDE PILLS. THE BEAUTY OF IT IS  
THAT IT KILLS ALMOST IMMEDIATELY  
WITHOUT ANY SYMPTOMS. YOU TAKE IT  
AND, SPLAT, YOU'RE ON THE FLOOR,  
DEAD.

I'M NOT SURE OF THE DOSAGE BUT  
IT'S NOT THAT MUCH.

THE WAY TO REFINE IT IS TO FILL  
COFFEE PERCOLATOR WITH THE GROUND UP  
FOLIAGE AND PUT EIGHT OUNCES OF  
ALCOHOL IN THE POT. PERCOLATE IT FOR  
ABOUT A HALF HOUR. IF THE ALCOHOL  
BOILS OFF, PUT IN SOME MORE.

CHEAP RUBBING ALCOHOL IS GOOD  
ENOUGH ONCE YOU HAVE DISTILLED IT OFF  
FROM ITS WATER CONTENT.

WHEN THE PROCESS IS FINISHED, POUR  
THE ALCOHOL AND WHAT WENT THROUGH THE  
PERCOLATOR INTO THE STILL. YOU THEN  
DISTILL OFF THE ALCOHOL UNTIL YOU HAVE  
ONLY A COUPLE OF TEASPOONFULS OF  
RESIDUE LEFT. POUR THIS OUT INTO A

MISM11.TXT

SAUCER AND LET IT EVAPORATE.

YOU CAN USE THE SAME PROCESS FOR  
A FINER GRADE OF NICOTINE FROM  
TOBACCO. ALWAYS STRIVE FOR QUALITY.

LAUREL IS ANOTHER EVERGREEN THAT  
CAN CAUSE DEATH BY EATING A SINGLE  
LEAF. IT IS BEST PERCOLATED AND  
DISTILLED BUT IT CAN BE USED AS IT IS  
AND PUT IN STEWS AND AS A GARNISH ON  
HORS D'OEUVRES.
