

## VAXDEF.TXT

This file is a compilation of at least 5 minutes of work looking through various text files and notes and buffer captures. All the defaults I could find are on here. Everyone of the accounts could also have NO PASSWORD, so try <cr> too. Theres no end to stupidity. The most likely to the no password accounts are the guest and demo accounts.

### UNIX DEFAULTS

Username:	Password: ,Password: ,Password: ,ect.
-----	-----
SYSTEM	OPERATOR,MANAGER,SYSTEM,SYSLIB
OPERATOR	OPERATOR
SYSTEST	UETP
SYSMAINT	SYSMAINT,SERVICE,DIGITAL
FIELD	FIELD,SERVICE
GUEST	GUEST,<CR>
DEMO	DEMO,<CR>
DECNET	DECNET

-partial list-

If you have any other default accounts, or ones that keep seeming to pop onto different systems, or if you know some of the default passwords to accounts w/out passwords on this list please update this file.
