

F - Upper Receiver

made of high-resistance polymer, matt black finish. General dimensions are Milspec with the exception of the fixing pins, so it is possible to couple it only with our lower receiver

G - Carry Handle
made of high-resistance polymer, it can be fixed on the picatinny with two fixing pins

H - Adj. Rear Sight
adjustable in elevation and windage, it is identical to the military model

E - Hand Guard
made of high-resistance polymer, milspec size - removable

C - Front Sight
adjustable in elevation, made of blued steel, Milspec

I - Fixing Pins
made of blued steel, pins and retaining springs are like the originals, milspec size

A - Compensator
Our Non-Functional compensator is made of steel, matt blued finish, and attached to the barrel with a set screw. The slots on the compensator are only aesthetical. The barrel and compensator are not threaded, but machined to the exact diameter. The barrel can be threaded to the size of ½ - 28 U.N.E.F. to mount a real compensator

K - Trigger
made of tempered blued steel, milspec size

J - Safety Catch
made of high-resistance polymer, it has two positions (Safe and Fire) which are visible also on the right side

T - Grip
made of high-resistance polymer, matt black finish. The shape is ergonomic, with a very modern chequering. Size is milspec, so it can be substituted with any milspec grip available on the market

mfour-22 carbine

Caliber: .22LR

Weight: Lbs 4,4 (kg 2,5) + handle lbs 0,44 (kg 0,2)

L - Lower Receiver

made of high-resistance polymer, matt black finish. General dimensions are Milspec with the exception of the fixing pins, so it is possible to couple it only with our upper receiver

R - Stock

made of high-resistance polymer, matt black finish, with sling slots. It is a fixed stock, the length cannot be adjusted. Size is milspec, so it can be substituted with any milspec stock available on the market

P - Charging Handle

made of matt blued metal, milspec size

M - Magazine Button

made of high-resistance polymer, matt black finish, milspec size

D - Front Sight Mount

made of metal, matt bluing, it is fixed to the barrel with a grub screw, the size is milspec. The bayonet connection is reproducing the original look but the size does not allow to clasp the bayonet

U - Inner Components

all components are made of tempered and polished steel and yield a very good quality of the trigger pull. The weight of the trigger pull is about lbs 6-8. All components are milspec

S - Trigger Guard

it is one piece with the lower receiver

O - Magazine

made of high-resistance polymer, matt black finish, milspec size. Available with 10 and 28 rounds capacity. Two magazines are supplied with the rifle.

Q - Sling Swivel

made of matt blued metal, milspec size

N - Ejection Port

made of matt blued metal, milspec size

B - Barrel

length 16", groove rate 1x16", matt blued finish
