

PACIFIC'S **NEW** MESUR-KIT™

*Combines Speed and Accuracy in an Inexpensive Portable Measure
Perfect For Field or Bench Use*

Just flip the "Mesur-Kit" charge arm and you have the exact charge required for any of 1,000 loads – from 2 grains of Red Dot to 70+ grains of Ball 2.

- **SIMPLE** – Screw into can spout. Adjust tube to graduation specified for your load. You're set up to accurately charge powder in seconds!
- **FAST** – Just by moving spring-loaded charge arm you drop an exact charge instantly. No bridging or clogging problems.
- **ACCURATE** – Adjustable tube is precisely graduated – easy to set. Arm has shearing action to insure precise leveling of charge.
- **COMPLETE** – Includes chart with settings for more than 1,000 loads. Includes universal powder can, but also fits standard Dupont and Winchester cans.

PACIFIC MESUR-KIT™

CHARGE TUBE NUMBER CONVERSION CHART

IMPORTANT: The information and loading data on this chart was developed from one basic lot of powder, using laboratory conditions and equipment. Because of variations in lots of powders, temperatures, humidity, methods and other uncontrollable factors, charges may vary slightly, if weighed. Start with a recommended light charge from reliable loading data and work up to the desired charge. Since Pacific Gunsight Company has no control over the manner in which products or components are used in the reloading operation, it cannot assume any liability for damage which may result from the use of the products or information given herein.
