Yes, Paracord Can Keep You Fed For Life

I talk a lot about the value of **paracord**, and there are countless uses for this incredible survival tool.

Probably one of the best uses for it using it to secure food.

Even if you were without any kind of survival food whatever you could use this incredible tool to stay fed for a long, long time.

There are a number of different methods you can use to catch both land-dwelling animals as well as fish.

To keep things simple for you I thought I'd focus on what I consider to be two of the *easier variations*.

These would include setting traps, or snares with the cordage, as well as using the cordage to create fishing nets.

Keep in mind there are other ways to catch animals with this cord.

You can use the inner lines and attach fishing hooks and weights and then attach it to a stick to create a fishing rod.

Or you can also use several of the inner strands and stretch them over a pit, place debris on top, and catch animals that way.

But for reliability's sake I tend to keep humans at bay. I think these are some of
