Hello Paul!

Friday October 20 1995, Paul MacGregor writes to John Mudge:

PM> This is the same idea that I recently had. I've got some on cutting
PM> boards, forageing for wild foods, etc. etc. I've got most of the files
PM> located and moved to their own directory on the big daddy (my new 1.2gig
PM> HD).

Mine should be here this afternoon...with a 486/100 tied to it. I will not be
able to afford a CD-ROM for it until next month or so though. Same with
sound-blaster. I am getting network cards to tie it into the online system
though.

PM> I hope to be able to repost some of these this weekend.

I have the two files on early and late spring foraging. Is there more to that
series? Also, I have this one which has not been posted here yet as I recall:
