We realize that pantyhose isn't the manliest item in your survival bag – but luckily for us, there's a surprising amount of **survival uses for pantyhose**.

Think about it – pantyhose is lightweight, washable, reusable, compact, and discreet. And if you have a wife, girlfriend, mother, or sister one of them is bound to have a pair (or two or three) in her dresser.

And the best thing is, these things are CHEAP! They're less than \$5 per pair, and if you ask around I bet you know someone that'll give you a pair for free (even if you might get a couple weird looks doing so).
