- [T-??] - reported active for phone testing
- (950S) - reserved for future alternate long distance services
- [976S] - for special announcements services

Note and Comment

Manitoba Telephone System (MTS) runs the telephone service in Manitoba.

While exchanges outside Winnipeg should be fairly complete in this list, MTS isn't too eager to list its Winnipeg exchanges too clearly. Winnipeg numbers are likely to be always somewhat out of date considering exchange growth due to cellular phones, pagers, growth of electronic exchange services, etc. No specific data has yet been found for mobile/paging exchanges.

One incident which occurred in late '90 was an attempt by MTS to introduce a 666 prefix to the Winnipeg exchange. This met with opposition, as the number 666 is associated with the number of the Beast mentioned in the Bible's book of Revelation, and the number is associated with satanism. MTS backed off the assignment of 666, and instead the new prefix 654 was used. In other areas, BCTel saw fit to assigning the 666 prefix to the federal government in area 604; other instances occur in some other North American area codes.

MTS has announced some expansion of local calling areas and other technical improvements in the province. This will likely mean service to new areas of the province (some new exchanges have already formed).

Some changes from previous release(s):

- Hecla is listed as 279 and is a new place in the Tel Codes list as of December 1991; other new prefixes are Winnipeg 771, 933, 982, 984
- with January '91 release, new Winnipeg exchanges include 336, 654, 770, 833 Split Lake 341, Fisher River 394. A 976 service appears to be active, and 958 is mentioned with Winnipeg location, but likely a test number.
- with April '90 release, new Winnipeg exchanges include 231, 333, 697, 784, 787, 896, 897, 932, 981.
- April '90: new Brandon exchange 332
- MacDonald has been replaced by Portage La Prairie (incorporated into exchange, or corrected from last Tel Codes issue).
- God's River is a new exchange (366).
- Tadoule Lake (684) is also new.
- some other corrections and updates made based on recently-obtained information
