Note and Comment

This is the updated edition of the 403 exchanges list. Any corrections or additions to this area code list would be appreciated.

Looks like 403 is approaching capacity; special action may need to be taken within the next few years such as expansion to "interchangeable" (area code style) prefixes, or splitting the area code.

Already, the rule of having Calgary numbers with 2## exchanges (like 232, 265) is broken. Some exchanges beginning with 5## or 6## are now available in Calgary.

The Northwest Territories and the Yukon under Northwestel could get their own area code. In fact, the entire Northwest Territories could be included were it not for these conflicts with Inuvik (979 exchange, area code 403) and Iqaluit (979 exchange, area 819). With a few conflicts resolved (noting that both Iqaluit and Inuvik are relatively major centres in the north), one area code could be used for both the NWT and the Yukon.

Some prefixes previously reserved for Northwest Territories and Yukon points (under Northwestel) seem to have been put into service as Calgary exchanges now, perhaps because they were not likely to be put into service for Northwestel's use. One interesting addition is 391 which seems to be for Lady Franklin and listed in one source as a "Test Pack".
