Other Notes, Legends

Country Abbreviations

Bb - Barbados
BVI - British Virgin Islands
DR - Dominican Republic
J - Jamaica
PR - Puerto Rico
SC&N - St Christopher & Nevis
T&C - Turks & Caicos
TT - Trinidad and Tobago
USVI - U.S. Virgin Islands

Other abbreviations and notes

[Diry] - Directory Assistance Exchange - presently, no access to directory assistance exists from Canada. AT&T reportedly has a system which allows connection to the appropriate operators of the various islands involved. Within the Caribbean itself, this may be used for directory assistance within a territory (not necessarily over the entire 809 Caribbean region).

??? - means that the exchange was found to be active, but that its location cannot be determined as of yet; this could be a switch misprogramming, or a forthcoming exchange

(T-PT) - reserved for phone testing

(950S) - reserved for alternate long distance service

(976S) - reserved for special announcements services

Note and Comment

Welcome to the wild world of Caribbean exchanges.

729 Trujillo Alto is listed in the San Juan, PR phone book as a San Juan and Santurce exchange. 729's place name was taken from inquiry of telco sources.

Trinidad and Tobago have been assigned country code 296, and is expected to move out of the North America system at some unknown time. Overseas dialing would then be used to reach Trinidad and Tobago numbers. In the meantime, Santo Domingo looks like the leader in terms of prefix growth in 809.

Acknowledgement goes to the place name facility on the newly-established ALEX service in Toronto which was of much assistance in getting information that couldn't otherwise be reverse-engineered from available phone books.
