\*181 are assigned to AT&T and have active customers. Only 105 of the 181 are available to new customers.

#These codes are available for assignment by all BOCs.

(1) Arrangements were made to activate a single line number in 800-246 to accommodate a customer with a shared (Southwestern Bell and AT&T) service in the state of Oklahoma. Their original number was 800-642. However, due to a typographical error, their advertising was released as 800-246. 800-246 in originating serving offices (OSOs), serving Oklahoma NPAs only, should be routed to the AT&T POP and subsequently to the INWATS database. All other OSOs should vacant code 800-246.

(2) 800-250 Has temporarily been assigned as a test number for testing purposes.

#These codes are available for assignment by all BOCs.

\*181 are assigned to AT&T and have active customers. Only 105 of the 181 are available to new customers.

(1) PER the LERG, 462 is an AT&T-C 800-NXX. a 1982 System Letter designated 442 and 462 as assignable for intrastate traffic only. Puerto Rico is, justifiably, completing intra-island traffic with it and thus cannot send 800-462 calls to the mainland. Customers experiencing this difficulty will be handled on a case-by-case basis.
