PART 1

INTRODUCTION

Welcome to PPP (Phuckin' Phield Phreakers) Newsletter #1. We hope to share with you new and useful information gathered through our experimentation and experiences with the various subject matter covered here. Also, we would like to introduce the group, PPP, as an official organization which specializes in the true meanings of phreaking, with a bit of anarcism mixed in there as well (of course!). So, this is our first official PPP release, so enjoy it, and pray that there will be a second one. Oh yeah, use and abuze, but don't let the pheds get you! (screw the r0dents!)

PART 2

GROUP INTRODUCTION

PPP, Phuckin' Phield Phreakers, is a group which was organized with the objective and need for an organized "true" phreak/anarchism group within the 619 NPA (located in San Diego, CA; North County specifically). We, the PUD (Phucked Up Directors) of PPP found it necessary to combine our efforts in order to maximize the efficiency of phield phreaking (aka, beige boxing, green basing, etc.) and the practice of anarchy. Because the founders of PPP, Killer Korean and Doctor Dissector, happened to reside within close proximity, we found it rather easy to put together a makeshift phreak/anarchy group within a small circle of phriends. However, we also have deemed it necessary to expand our circle to include the more experienced or ambitious phreaks/anarchists as well as non-phreaks/anarchists (who are willing to learn) residing in the North County section of the 619 NPA.

Our objectives are to find new and exciting information concerning the 619 NPA's telco activity, experimenting with new boxes and equipment hand-built by our members, experimenting and practicing anarchism, and of course, phucking over Ma Bell and her Gestapo.

PART 3

PPP1.TXT
PHUCKIN' AROUND

This section in the PPP Newsletter will be devoted to educating and sharing new found or re-found information concerning the phreak/anarchist community, as well as group achievements. Enjoy it while it lasts.

Achievements:

Examined green bases, enabling the production of TPH#2
673 Busyline Project
679 Busyline Project
Produced four beige boxes
Practiced Phield Phreaking
Experimented with Saltpeter
Revenge *

Projects:

673 Busyline: 673-9512 was converted from a non-residential line to a permanatly busy line. Lasted approximately 36 hours from first contact. After contact was cut, the fone number rang suspiciously. Possible leak in BBS security on elite boards in the 619 NPA.
679 Busyline: 679-7776 was converted from a non-residential line to a permanatly busy line. Lasted approximately a week from first contact. This fone number was not released to the general elite public of the 619 NPA, but the line also rang suspiciously after the week. Possible intervention by the phone company.

Revenge:

Sweet revenge which can not be discussed further than that it caused over \$500 worth of property damage. They deserved it!

PART 4

PHUN STUPH AND SUCH

This section will be dedicated to the technical info and procedures practiced by PPP. This will include anarchial phormulas as well as schematics for boxes which will be used by our members.

PPP1.TXT

Experimenting with Saltpeter:

PPP experimented with saltpeter (potassium nitrate) bought from Longs Drugs (4 oz. for \$1.99). We discovered that most mixtures from this oxidizer were slow burning and required a lot of sulfur to burn properly. However, these mixtures created A LOT of smoke and a sulfurous stench, GREAT for other purposes.

Busyline - How to:

To make a fone number busy FOREVER (or until someone kills it), you venture to a green base and open it. Find an open line, which means a pair of terminals which are not connected to residential telephones. Use ANI on the open line, record the number, and with a paper clip or other piece of wire, connect the ring and tip so that they short each other out. Be sure it is secure and that the wire is not interferring with the other terminals. Also, if you hate someone and want to give them and their fones a hard time, put this on a working residential line and have phun.

PART 6

PPP1.TXT
CLOSING AND GOOD-BYES

Well, that wraps up PPP Newsletter #1. So, I bet you can't wait for our next, great issue. PPP #2 should include more on Phield Phreaking in general, Gold Boxing, Pipe Bombs and Potassium Chlorate explosives, and a bunch of other phun surprises. Until then, this is Killer Korean and Doctor Dissector logging off.....

NOTE: If you need a busy line or a ring forever line, or any other assistance, leave e-mail to the PUD's of PPP on any of the 619 elite BBS boards in San Diego. If you don't know any 619 elite BBS's, stop reading text philes now!
