[illegible]

Welcome To The Phuckin' Phield Phreakers Newsletter

Welcome and hello to all non-lamers out there. We, PPP-619, have been putting this second newsletter together of some time now, and I hope this is a pretty good one, at least better than our first one.

Anyway, we have lots of stuff here, new members lists, our text philes listing, scan results of the 619 NPA, junk on gold boxes, more projects, and just a bunch of little things you might find interesting.

Page 1

of this stuff interesting, and useful, if not, oh well, maybe in our next newsletter, something of interest will capture your attention.

Till then, seeya all...

NPA 619 SCANNING RESULTS PART][

NPA 619 Is Located In Southern California, San Diego Country Area

This is the second part of the latest and greatest scanning that is being and has been done in the 619 NPA. This document is dated in the Fall of 1989. Note the following NOTE so that you don't get pissed off if you find something different. Future parts to this series will be posted on local 619 BBS's as well as future issues of PPP. If you have something to contribute, please call the BBS's at the end of this issue. Thanx.

```

748 Exchange Scanning

* Scanned By: Doctor Dissector

Looking For That Damned PUSD Computer.....

748-0002 - LOUD Tone blasts the line....
748-0237 - connects, sits there
748-0252 - logoff
748-0265 - logoff
748-0266 - logoff
748-0309 - connects, sends out a steady stream of characters at a certain
rhythm... I don't really know what it is. Check it out...
748-0349 - logoff
748-0375 - logoff
748-0378 - logoff
748-0413 - logoff
748-0465 - logoff
748-0532 - logoff
748-0571 - Poway High School Net BBS (300 bps, 8,N,1) (p.s. A WEAK bbs...)
If you are bored, try crashing this one... (phun... hehe)
748-0642 - connects, but when sending a BREAK signal, it sends you a "?"...
Figure this out...
748-0667 - logoff
748-0680 - logoff
748-0912 - connects, sits there
748-1001 - logoff
748-1002 - logoff
748-1307 - logoff
748-1342 - logoff
748-1379 - logoff
748-1458 - logoff
748-1466 - logoff
748-1603 - connects, sends garbage at 1200,8,n,1 & 1200,7,e,1
748-1734 - recording (voice)
748-1879 - logoff
748-2005 - logoff
748-2263 - logoff
748-2301 - logoff
748-2499 - logoff
748-2856 - connects, sends garbage & then logs off

PPP2.TXT

748-3119 - logoff
748-3174 - strange tones
748-3212 - strange tone - oscillates between silence & tone
748-3407 - connects, sits there
748-3460 - strange tones
748-3505 - connects, sits there
748-3528 - connects, gives feedback (when pressing return), messed my comm program up somehow when I connected at 300 bps 7,E,1, and I had to cold boot the system to get everything back to normal. Strange.
748-3564 - rings forever...
748-3644 - dBored PD BBS system, non-subscription node. 300-2400 non MNP's. This is the non-paid node of this 3 node BBS system (3 I think...)
748-3706 - connects, gives feedback (when pressing return), nothing else I think this is like the 748-3528, but I deliberately connected at 1200 8,N,1/7,E,1/8,M,2/8,M,1 without any luck regarding anything big besides a bunch of stoopid looking characters.
748-3716 - connects, sits there

```

:               (NPA)PRI-VATE                           :
:-----:
```

OK, this is a compilation of the scanning I did of the 741 and the 744 prefixes. I used Code Thief v3.5 for this one. It's a pretty cool program.

Date: 10/26/89

```
=====
0002      : LOUD tone! Blow your fuckin ear off!
0003      : Sounds like a spaceship or some shit like that.
0028      : This is the number that voices start.
0038      : CARRIER - Don't know, just hangs up on you, but is a CARRIER.
0041      : Small tone.
0063      : Tone that sounds like a computer, but strange.
0077      : Another tone, strange. Possibly a FAX or something.
=====
```

That was a scan of 0000-0100. That's enough for one night, I'm damn tired and going to bed. Will continue scanning tomorrow.

Date: 10/30/89

```
=====
0103      : Another tone.
0105      : Definite CARRIER! See what you can do with this one.
0121      : AT&T Fiber North. Don't mess with this one.
0193      : Another tone.
=====
```

PPP2.TXT

That was a scan of 0101-0200. Not a shit fuckin thing there, but you can see what you can get out of that 0105 one. It gives you a tone and then kinda stops. Strange, but it is a CARRIER.

Date: 11/30/89 - Scan of 744 prefix

=====

1000-1135 : Nothing except...
1117 : Tone, but just stops.
5000-5100 : Nothing except...

.....

5019 : CARRIER... at 2400 8-N-1

Display:

xenix386!login: [I entered anything and got...]

Password:

Play around with that one. Could be good.

.....

9902 : First you hear some bitch say "Thank You" in the computer voice,
then you hear I think 4 DTMFs. Strange.

.....

9909 : CARRIER... at 300 7-E-1

Display:

T2A*6197449909*29135*AC1009*0784*000*8911305141842N

Strange, but that's what it sent at 300 baud. At 1200 it just hung up.

.....

9922 : CARRIER... at 300 7-E-1

Display:

T2A*6197449922*50815*AC1009*1465*023*8911305141634S

Another one of the above.

.....

9970 : CARRIER... at 300 7-E-1

Display:

T2A*6197449970*70675*AC1009*0810*000*8911305142223[

Yet another one.

.....

9972 : CARRIER... at 2400 8-N-1

=====

Those are my scan results for now. In PPP #3 I will have some more for ya.
My ultimate goal is to find the San Marcos High School's mainframe or megaframe
or whatever it is. latro...

Dark Helmet

SCAN-FAN v1.0

Whats up everyone? Well its me Tak/Scan writing a text file again. Over
the past few days I have been scanning local number in the 619 area. I
will list the dates and number plus a little thing of what they are. Have
fun and use and abuze these numbers. Slatro! Tak/Scan -PPP!

## Page 7

## PPP Project List Since Issue #1

This is a short listing of what we have done since our last issue.

Meetings - PPP has held two official meetings since the first newsletter. Both were good successes, even though we didn't end up doing much except racing around on the highway at speeds exceeding 120 mph. However, plans were being created for future projects, such as gold-box building and anarchist experiments.

Bulletin Boards - Insidious Infusion, PPP-Global HQ has been opened up to LD and PPP members only. PPP TeleTrial has also been started up in our multitudes of support BBS's. Also, Internal Stack has gone the way of Insidious Infusion and is now private to LD callers and PPP members. Fourth Dimension may be changing its number and go private, and as for Knight Shadow's Grotto, we have yet to see. 4 C.A.D. Systems exist as of this newsletter, Insidious Infusion, Internal Stack, Fourth Dimension, and Knight Shadow's Grotto.

Gold-Box - We attempted to build and test a gold box, but it did not work. We have some real sketchy schematics, and we don't know if the problem is in the schematics, ESS, or the circuit we built. We would like advice on this if someone (anyone) had it. Call our Bulletin Boards.

Anarchy - PPP officially and unofficially practiced anarchy and destruction during the course of the past few months. Destruction was at its prime when a few of us went out and phucked everything up everywhere you could imagine. Also, a new chemical mixture (Sulfur and Zinc Dust) was formulated for hot-burning green smoke-clouds (experiment with mixtures, we messed with 50-50).

Text Philes - Doctor Dissector, Killer Korean, Dark Helmet, and The Lode Runner have all contributed to the text phile output of our group. We have a total of 20 text philes out and plan on more and more for the near future.

Hax/Vms - Doctor Dissector modified his copy of the WWIV source code and re-named his new version Hax/Vms. It kix ass. Since it runs so fast and DD has more mods for it on the way (today it is at version 1.29), the software will probably compete in place of TCS/Apex look alikes for the elyte domain. Distribution is limited.

[illegible]

[2.6] PPP Newsletter

# PPP's Bulletin Board Project

-----

On the distribution of Hax/Vms, distribution will be severely limited to only a few select SysOps. An application for the software is available through the application of the PPP-Node application, and MOST applicants will also have to become PPP sponsors to their NPA, if not, a few will be given the software for "phree" without any obligation.

[illegible]

## PPP Member List

-----

## Phuck'd Up Directors:

# Killer Korean

General Membership:

## The Lode Runner

Tak/Scan

Also, we might be interested in PPP-Sponsors for other NPA's besides 619, and more members as well. Those applications are floating around in the Underground BBS community somewhere, or call the 619 elyte boards for them, they should have them

[illegible]

[2.8] PPP Newsletter

## PPP New Info And Shit List

.....

In our next newsletter, we'll tell you about more gold box shit, cuz we're gonna try to make another one. Also, we'll bring you more scanning result for you hackers out there, as well as a major anarchist experiment to come.

About new info, well, lesse... I guess everything's up there, and shit, well shit, I don't know why I included this part into the newsletter!

Anyway, our newsletter keeps getting bigger and bigger, if you would like to submit things to our newsletter, call any of our PPP CADSs and upload your shit, if it's good enuff, we'll put it in!

[illegible]

[2.9] PPP Newsletter

## Conclusion and Greets

.....

Well, that's it for now, our new PPP Newsletter #2. We hope you found it semi-interesting as well as exciting, but if not, oh well, maybe next time. Don't forget to fill our app's out if you're good enuff of a phreak, or want to run our awesome, kick ass, software. Be expecting issue #3 to come out sometime this month (December), probably during Winter Break, when we have lots of time to waste.

Till then... doodz..... Later...

PPP-619

Greets To:

cDc - Whud up boyz 'n' girlz... we love your text philez...

TCS - We love TCS, but Hax might get better... Also, if you can, try taking our more of your bugs.... I can relate... programming is a big bitch!

Everyone else... oh well!
