

Sq. Ft. Seed Tape Making

Using paper towels squares like this is also a great way to set up your squares for square foot gardening.... you can set up the squares and just lay them out as each square is ready for succession planting throughout the season... as well as setting things up at the beginning of the season, of course... makes it just such a simple thing to be able to get that square planted just as soon as it becomes vacant.. and you can set up your paper towels with their seeds while sitting in a nice comfy chair at the table instead of sitting on the ground!

Neat way for setting up squares that have succession crops in them.. for example... carrots, a root crop that takes longer to mature.. interplanted with lettuce.. and above ground crop that matures quickly... you can double crop the squares.. with the convenience of the paper towels..

I just love finding creative ways of making the work easier.....
