MONITORING AIR SHOWS

-----

By: John Johnson (Topol) KVV8BP

If you have ever been to an air show then you know the thrill of excitement as the pilots show off their skills, but you could be missing out on the ultimate thrill, that is actually monitoring the pilots and all of the communications that go with what goes on around an air show. The following frequencies have been compiled from various sources including Monitoring Times and Popular Communications. Most all have been confirmed.

U.S.N. BLUE ANGELS:	ground support	121.90
