FEDERAL FREQUENCIES

By: John Johnson, KVV8BP
of The Hotline MBBS 304-736-9169

These frequencies have been confirmed by various sources including Monitoring Times, Popular Communications, and friends. Frequencies that are the same yet have been heard in other states, cities will have the state or city listed with it, plus the identifier for that certain area. If you would like to see some of the other files that I have or would like to leave your files with us, call us at The Hotline BBS 304-736-9169. This is a new BBS which I am running I have put this BBS up strictly for Scanner & Radio enthusiasts and also for informational purposes on UFO's. A quick note about my Files, in the past they were made on an Apple type computer which did not add the line feeds or returns, IBM persons had trouble viewing them, I have now switched over all my files to meet the IBM standard, you can simply view them by using the Type command. Call us down here we offer many online SIGS, our storage capacity is right around 3 gigabytes... When logging on The Hotline and filling out your new user status, there will be a question asked what your interest is in calling the Hotline, Please mark Scanner here and you will be taken care of STAT....

A COUPLE QUICK NOTES ABOUT SOME OF THE FREQUENCIES

=====

The Scrambling method used by Federal Agencies is DES, Digital Encryption Standard, this type of scrambling is found on certain type of Motorola equipment. Digital Encryption sounds like a bunch of tones and beeps and is quiet nerve racking, this type of scrambling is very hard to crack unlike Phase Inversion. DES uses a preset code that can be anything of about 10,000 different combinations. These combinations are changed periodically, the field agents may not even know the combination... Even if you would happen to find a code which is unlikely you probably wouldnt hear it for long. The only way I can think about cracking it would be to have a computer program that could sample the combinations super fast, even then it would take a considerable time to find them.

FEDFILE.TXT

Now Phase inversion types of Scrambling is pretty easy to crack, note that it is against the law to make or own any type of descrambler that will intercept police frequencies that are scrambled. Some companies are now offering kits that you can build that work on phase inversion...

Ramsey electronics is one of the companies. For more information concerning this and other companies and these types of kits and laws about there use leave me E-Mail.....
