The frequencies marked with the ** are the assigned base repeaters. If you have a known good 800 Mhz frequency and you do not hear any-one on it, add 45.0000 Mhz to that frequency. Then you may be able to find the base repeater. Also the frequencies that are marked -New may not be used for several years.

Example of finding base repeater: PD Mobile 811.3000
Add 45.0000
Base repeater 856.3000
