

NUCREG.TXT

NUCLEAR REGULATORY COMMISSION

Copied By: John Johnson, KVV8BP
Source: Reg. of U.S. Govt. Radio Freq's

In addition to frequencies indicated here, the NRC is believed to have the capability to operate on VHF/UHF frequencies of the Department of Energy at that agency's nuclear facilities. During the Three Mile Island nuclear emergency, the NRC was monitored using frequencies assigned to the Interagency National Emergency Fire Cache (INEFC). In the event of any future nuclear hazard, INEFC frequencies would no doubt be used again by the NRC during the critical phases of the situation.

HF Frequencies:

2378.5, 2446.5, 2659.5, 3342.5, 3380.5, 3389.5, 5212.5, 5962.5, 6050,
6107.5, 6152.5, 6177.5, 7349.5, 10494.5, 11722.5, 11802.5, 11958.5,
12217.5, 14477.5 14837.5, 14886, 14900.5, 14909.5, 17650.5, 20028.5 Khz

Daytime calling/emergency frequency is 10494.5 Khz; nights it's 5212.5 Khz.
Secondary or backup frequency is 17650 Khz. 20028.5 Khz. is common to all
NRC Regional Offices.

Arlington, VA	KYE281	168.45	416.40		
Bethesda, MD	KYE280	167.875
