I've said it before, but I really can't emphasize this enough: there's no survival skill more important than improvisation. Survival hacks are a great way to put your skills to the test and see how many uses you can come up with for a common object.

Take a soda can for example. It might not seem like much, in fact it probably just seems like a piece of trash. But there are several surprising survival hacks that can turn a common soda can into a useful tool.

It just goes to show that you can do anything with a little creativity and skill. Check out these great soda can survival hacks, and see if you can come up with any survival hacks of your own.

At Survival Life our mission is to provide a vast amount of knowledge, training, and skills in the survival and preparedness fields, to any and all who wish to become more prepared for what may come. We will take a logical and no nonsense approach to survival without bias in hopes of dispelling the myth that anyone who prepares themselves is crazy or paranoid.
